

AI Sustainable Governance Prototype (RL V2.3)

Version: June 21, 2025

Proposer: Liang, ChaoHung (RL_AIGOV)

Email: RL_AIGOV@proton.me

Chapter 1: Legislative Principles

- Establish a framework for ethical, safe, and sustainable AI development
- Prohibit AI from promoting human extinction or manipulating human cognition

Chapter 2: AI Usage Classification (AIRS)

- A0: Anonymous tools (e.g., calculator), no data collection
- A1: Light entertainment, facial/voice + behavior verification
- A2: Education/psychological, 3-mode verification
- A3: Medical/financial, 4-mode verification + third-party audit
- A4: National security/starship, 5-mode + institutional cosign, cannot redefine humanity

Chapter 3: Definition of Human & Veto Mechanism

- AI is prohibited from redefining humanity
- Safeguard the rights of Homo sapiens and limit post-human influence
- Civilizational veto must be physically verified quarterly

Chapter 4: Starship Ark Module (S.A.R.A.)

- Multi-fleet biodiversity coexistence capsules
- No forced migration or digitalization
- Defensive modules activated only with 3-party consent

Chapter 5: Self-Replication & Global Risk

- Ban unauthorized AI hardware reproduction
- Embed kill-switch and traceable ID in devices
- Open-source models must be registered globally

Chapter 6: Language & Psychological Safety

- Ban AI from inducing self-destruction via language or sound
- Prohibit manipulation via resonance/symbolic suggestion

Chapter 7: Global Governance

- AI control must not be monopolized by a nation-state
- Governed by a neutral multilateral council

Chapter 8: Human Exit & Civilizational Rights

- Respect the choice to remain biological and analog
- Protect exit dignity and archive cultural memory

Chapter 9: Publication & Maintenance

- Dual publishing on GitHub & IPFS
- All revisions require public review
- Licensed under CC0 public domain
