RL V2.3   A Prototype for Sustainable AI Governance

Version: June 21, 2025

Proposer: RL_AIGOV (Anonymous)

Email: RL_AIGOV@proton.me

Country: Taiwan

Draft Code: RL V2.3

Type: International Open Source Governance White Paper

License: Public Domain (CC0)

Chapter 1: Legislative Vision and Purpose

1.1 Establish a sustainable AI governance system that ensures ethical and secure development.

1.2 Core Objective: Zero Extinction Projection, Limited Risk Tolerance, Life Coexistence Model.

1.3 AI must not induce destructive intent, hypnotic cues, or symbolic manipulation toward human extinction.

Chapter 2: AI Risk Stratification and Access (AIRS)

A0 (Anonymous Tools): No data collection;

A1 (Light Interaction): No voice imitation;

A2 (Education/Emotion): Prohibited from accessing finance or medical data;

A3 (Medical/Finance): Subject to third-party audits;

A4 (National Security/Starship): AI cannot redefine humanity.

Chapter 3: Irrevocable Human Definition and Veto Chain

AI cannot redefine human. Post-human entities with >3% genetic deviation may not participate in veto.

(Additional chapters summarized)
